innovation with simplicity. We aim for a Digital transformation toward innovation with simplicity,

Who we are:

striving to be a Company that delivers cutting-edge solutions, helping the world, mankind, enterprise and fortune 500 companies, all in one go.

Let your imagination fly, this has always been the spirit that made

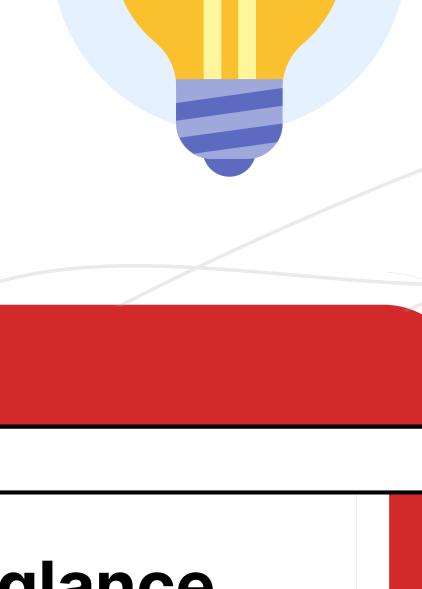

that we all believe in. we aim for a digital transformation towards

Techmapperz possible, We are a team of free-thinking individuals who

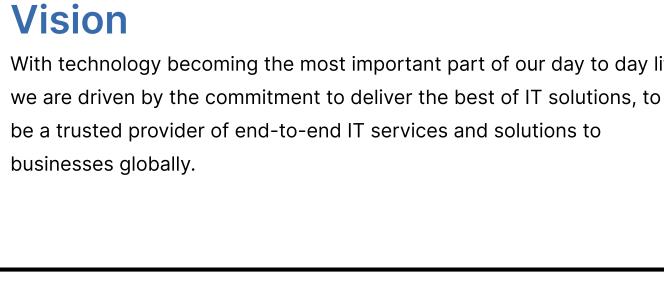

believe that the solution to a complex problem need not be complex, that

complex issues should have very simple solutions, and this is the change

Techmapperz at a glance

With technology becoming the most important part of our day to day life,

Flexibility

with open minds,

focus, and speed.

We scale new heights

Simplicity

We keep the solution

simple for scenarios

How Do We Work?

Individuals and interactions over processes and tools.

Working software over comprehensive documentation.

Customer collaboration over contract negotiation.

Responding to change over following a plan.

We follow the 4 values of Agile:

that are complex

problems.

Mission

We at **Techmapperz**, understand that each organization is different, and

so are their challenges, so when we tailor solutions, we ensure that it is

as simplified as it can be. Our mission is simplified solutions for complex

Ingenuity

We harbour and nourish

thoughtful, imaginative

and motivating ideas

Accountability

other to take ownership

We empower each

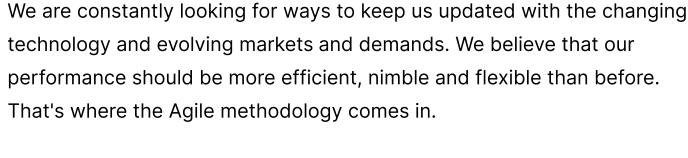

of our actions.

Integrity

We make responsible

professional standard

decisions based on

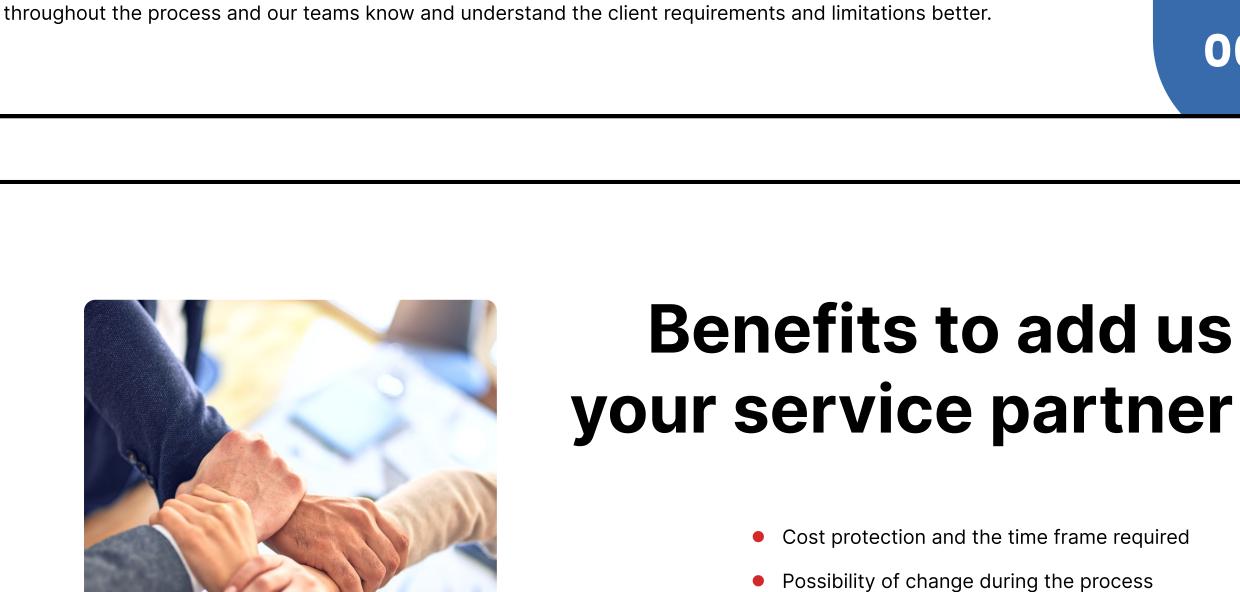

05

Constant feedback and a superior product result Reduce the risk of error and the investment

Following Agile methodology gives us a high degree of understanding of client requirements and collaboration

between the client and the development team. We have happier clients because we maintain transparency

And More

a 4 step approach on how we execute a project

us since we take so much care of everything that precedes this.

Why Choose Us

This is the first and foremost step in delivering your project way ahead of your expectation, though we are driven by results, we never let that hamper our course of understanding you and your requirement, we ensure that our research is onto every vertical that involves the company competitors, target market and customer psychographics, this is critical and crucial in our further action plan. We have a talent pool to make any company jealous, and we use this talent pool to do the creation in such a way it serves our mission statement "simple solution for complex scenarios". what our team creates not just fills the vacuum of your requirement. But also ensure that the solution remains simple while doing so. In the process also ensure that we remain committed to the budget and deadline. The word defines a lot of internal and external factors and processes that we do to ensure that everything goes as planned, this is always project dependent, but the crucial step that we undertake under this is to keep your project and requirement confidential, keep it to need to know basis amongst all sections of employees, also maintaining multiple tier experts for the tab on the billing or unexpected or additional expenses. With a lot of government and time-sensitive clients' jobs that we do,
